

## Facial Aesthetics

Eye Care for the Adirondacks Aesthetic Center, in our Plattsburgh location, provides aesthetic procedures for facial rejuvenation to enhance your facial and eye areas. Call us directly at 1-518-562-1233 for more information about our services or to schedule a **free facial aesthetic consultation** with Shalini Kapoor, MD.

### Services:

**Facial fillers** are simple non-surgical, physician-administered, injection treatments for facial rejuvenation. They safely restore lost volume under the skin thereby smoothing away wrinkles and facial loss of volume from aging, most commonly at the lips, creases around the mouth, crow's feet lines and frown lines. You and our doctor will determine the number of injections and treatments you may need during your visit.

**BOTOX®** is a prescription medicine that is injected into muscles used to temporarily improve forehead lines and frown lines between the eyebrows. The treatment can last up to 4 months.

**JUVÉDERM®** is a smooth dermal (gel-like) filler injection that eases under your skin to both fill in facial wrinkles and restore lost volume, providing your skin with a smoother, more youthful appearance by adding volume and hydration and has been proven to last up to one year.

- **JUVÉDERM® XC** injectable gels revitalize the face, smooth the skin, and reverse the early signs of facial aging. Containing 0.3 percent lidocaine, this injectable allows for a quick, easy, and virtually painless treatment.
- **JUVÉDERM® VOLUMA™ XC** injectable gel offers a slightly superior performance that contains a small quantity of local anesthetic and is injected into deeper lines and creases to smooth wrinkles and folds, especially around the nose and mouth and the results last about 1 year.
- **JUVÉDERM VOLUMA® XC** is an injectable gel to restore the youthful shape of your cheek area, giving you a smoother, natural-looking contour.

- **JUVEDERM VOLLURE® XC** injectable gel is designed to give your facial lines a smoother appearance, whether you choose a more subtle volume or a little extra volume. It is the longest lasting filler and can last up to 18 months.
- **JUVEDERM® ULTRA XC** injectable gel is for the lip and lip area providing a plumper appearance for lip fullness and can last up to one year.

**KYBELLA®** is an injection to improve the appearance and profile of moderate to severe fat (called double chin) below the chin. Multiple injections are typically required, and our doctor will discuss your aesthetic treatment plan with you.
